

# You Stay with Me

Faith Hill

T.V flashes down the hall  
Painting pictures on the wall  
And you're still sleeping on my knees  
And in the glow of silver light  
I trace the lines above your eyes  
Just another wrinkle that you can blame on me

But I can hear the current of the freeway in the distance  
If I keep listening  
And I wonder if you ever thought of streaming off  
Somewhere with it  
Am I not what you thought  
Will you get tired of what you got

[Chorus]

If I can't give you anymore  
Than weathered ships and distant shores  
Would you still be my compass  
'Cause you keep loving me the same  
I don't know how but you still stay with me, baby  
You stay with me, baby

Another day, another week  
We'll slip back in old routines  
'Til nights like these come in between  
Simple moments in the dark  
Ones that life can't tear apart  
They come along just when we need

And I still hear the current of the freeway in the distance  
But I stop listening  
'Cause I know you'll stay even though the waves are always shifting

We're fighting our way through  
I guess I always knew
