

Where Was I

Family of the Year

Got myself in a mess
I love you and I don't know how
How I got into this mess
But I love you and you want out
I love you and you want out

I should have caught myself
I wish I never heard your name
But I can't help myself
Like I'm addicted to the pain
And now I'll never be the same

Where was I
When I was falling for you
I was falling for two
If only I knew what to do

I guess I'll be alone
And probably in love
I guess I'll be alone
And probably in love

I want that part of me back
The days to fade away
Why is it always something
We're nothing it's okay
Just standing in the doorway

Where was I
When I was falling for you
I was falling for two
If only I knew what to do

I guess I'll be alone
And probably in love
I guess I'll be alone
And probably in love

Tried and tried
While you lied and lied
I said goodbye
While you held on so tight
Don't ask me why
I keep the dream alive

Where was I
When I was falling for you
I was falling for two
If only I knew what to do

I guess I'll be alone
And probably in love
I guess I'll be alone
And probably in love
