

# Home Is Where The Stars Are

Farmer Boys

Come and take a ride with me  
Up to the stars above  
Far away from all the hatred here disguised as love

Come fly away with me  
Where everyone's a star  
And no one is ashamed to be  
The creature that they are

Ground control I'm going home  
It's my new destiny  
So take a picture now  
Cause you have seen the last of me

And there's no time for crying  
No time for goodbye  
It's time now for the rocketship to fly

Gravity will never hold me

'Cause home is where the stars are  
All alone with you

I'm gonna go with you  
And live up in the skies  
I've had enough of planet earth and all its life

We'll watch it on the screen  
Drifting by below  
And all this pain will only seem  
Like some bad TV show

Ground control we're going home  
Along the milkyway  
So write this down  
'Cause these are the last words you'll here me say

We're flying to the future  
We leave behind the past  
Now wave "hello", we're coming home at last

Stardust was made just for us

'Cause home is where we both belong  
There where we come from  
Cause home is where the stars are  
All alone with you

Home

'Cause home is where the stars are  
All alone with you
