

I would love to see you out here tonight
Just you dancing under the light

Awake when I sleep
And I know it's you
I sing a prayer
I wrote just for you

Feel her touch you
Make no sound
There is love all around
Can you hear this song tonight
Calling out to you?

Can you hear this song tonight
Calling out to you?

Hold on to my heart I will take you there
Under moon and stars I will take you where
Oceans gather
Make no sound
There is love all around

Can you hear this song tonight
Calling out to you?

Can you hear this song tonight
Calling out to you?

All the pretty stars coming out to see
All the pretty stars and maybe you and me
We'll be watching off the ground
There is love all around

Can you hear this song tonight
Calling out to you?

Can you hear this song tonight
Calling out to you?

I would love to see you out here tonight
Just you dancing under the light

Can you hear this song tonight
Calling out to you?
