

I've Got Everything I Need

Favez

You bore me completely
I've got everything I need
It's easy too easy
I'll come right in
So you can see it's on me
So how do you like me
So hurry it's worth it
If you're happy almost every time
I breathe it hurts me I'm like you
I am too I've got everything I need
I'll stay here and lie here
And think of all the things you do
Then I'll get up and do them too
And in everything I see and in everything I see
I've got someone watching me
It's been years since you've been here
I've got someone watching me
And the years since you've been here
And if everything comes back
Will it mean it'll fade and all go black
And if everything comes back will it mean
It'll fade and all go black again
You bore me completely I've got everything I need
