

# The Goodbye Song

Favez

He woke up early  
The wind howling neath the skin  
He saw the walls all closing in  
This is how it all begins  
He felt the life go out once again  
Just like a goodbye song  
That goes on too long  
And did it please her  
Was it right and was I strong  
Was it good and is good all wrong  
Is good enough to light the grey zone

If I could spend just one night alone  
I'd be myself I swear I'd get out of there  
I'd do it once if I really cared  
The light is out the thrill is gone  
He felt the life go out once again  
Just like a goodbye song  
That goes on too long  
And if I breathe it'll all come to end  
Just like a goodbye song that goes on too long  
And if I breathe it'll all come to end  
Where has it gone, where has it gone  
Where have I gone

So we're no different  
It won't be branded on skin  
You won't feel nothing you won't feel bad  
Guess the first time is the hardest  
It's like a key that locks and locks  
And I don't like oh the place I'm in  
It's a place of whispers of shadows and lies  
It's the new world that I live in

I feel the life go out once again  
Just like a goodbye song  
That goes on too long  
And if I breathe it'll all come to end  
Where have I gone  
Where has it gone

And did it happen  
It all seems so far behind  
Can I do it just one more time  
Only once and then it's over  
I can choose I got all the time  
And when I see her man, will she understand  
I can keep it in once again  
Where have I gone  
Where have I gone

I feel the life go out once again  
Just like a goodbye song  
That goes on too long  
And if I breathe it'll all come to end  
Just like a goodbye song  
That goes on too long

And if I breathe it'll all come to end  
Where have I gone  
Where have I gone  
Where has it gone
