

# Magnetic

Fenech-Soler

We're standing on a fault line  
Caught in-between two minds  
Exhale this city filling up our lungs  
Let the light dust settle

When we're through with this place  
The past will be erased  
Counting down the hours  
Synchronize 'til we take control

It's a feeling  
In the great unknown we can burn it out  
Cause I needed to show you  
There's a world outside that we've never seen  
Can you feel it too?  
Can you feel it too?  
In a world where nothing feels real  
Can you feel me too?  
Woah woah

I'm pulling hours out from under our armor  
Follow the river down to the sea  
Rising up gonna come back stronger  
We keep on running through these empty streets

It's a feeling  
In the great unknown we can burn it out  
Cause I needed to show you  
There's a world outside that we've never seen  
Can you feel it too?  
In a world where nothing feels real  
Can you feel me too?  
Woah woah

When the night's magnetic, we'll run  
When the night's magnetic, they'll come  
When the night's magnetic, we'll run  
When the night's magnetic, they'll run  
When the night's magnetic, they'll run  
When the night's magnetic, we'll run

Can you feel it too?  
Can you feel it too?  
In a world where nothing feels real  
Can you feel me too?  
Woah woah
