

First You Break It

Filter

Feel like no other, trying to recover
Watching what happens when you do it wrong
Seeing you could swallow, laughing with the others
But it's better long

First you break it then you fake it
Try and pass it up like we won't know
First you break it then you fake it
Try and pass it up like we won't know

I can't believe what I read on the screen
It's a star filled night and you turn off the lights
It's the safest place that I burn in the stake
It's a sparkling, shining, heartfelt pride

First you break it then you fake it
Try and pass it up like we won't know
First you break it then you fake it
Try and pass it up like we won't know
