

Don't Look Down

Finger Eleven

It doesn't matter that the rain is gone
You know it's coming back *coming back*
Just as sure as the sun burns through
Until it burns out black *burns out black*

Don't let anything faze you know
That you've found your stride
Just when everything feels ok
Just suddenly not quite

Don't look down
Just close your eyes and keep your head in the clouds
Cuz it's only a matter of time before you hit the ground
But until you fall you're gonna have to live this out

I wouldn't focus on the negative there's no point in that (point in that)
Nothing says you can't enjoy the ride
Even if you are off the tracks

Don't let anything bring you down
Keep on burning bright
Just when everything feels ok
Just as suddenly not quite

Don't look down
Just close your eyes and keep your head in the clouds
Cuz it's only a matter of time before you hit the ground
But until you fall you're gonna have to live this out

Don't look down
Close your eyes and keep your head in the clouds
Cuz it's only a matter of time before you hit the ground
But until you fall you're gonna have to live this out
