

## Fall for You

### Firefall

You can steal the night  
And make it come alive  
And the spark in your eye's a turn on  
There's a chance I'll be  
The next in line  
Falling apart and left by the wayside

You come on like a vision in the night  
Brighter than a shining star  
Cast your light of love on me and we'll go far  
Rock my heart like thunder  
Your loving takes me under

Did you think I would ever fall for you?  
Did you think you would ever fall for me?

Take me down for love  
And put a spell on me  
Let it become my soul's emotion  
I'm a man who needs love  
And a friendly kind  
I can't get lost in love's illusions

You come on like a vision in the night  
Brighter than a shining star  
Cast your light of love on me and we'll go far  
Rock my heart like thunder  
Your loving takes me under

Did you think I would ever fall for you?  
Did you think you would ever fall for me?

Did you think I would ever fall for you?  
Did you think you would ever fall for me?  
Did you think I would ever fall for you?  
Did you think you would ever fall for me?  
Did you think I would ever fall for you?  
Did you think you would ever fall for me?  
Did you think I would ever fall for you?

Did you think I would ever fall for you?
