

when i'm gone

Flatbush ZOMBiES

It's like

I just wanna die, I just wanna cope
All I see is pain, I done lost hope
I just wanna live, I just love the thrills
I just lost my mama, I don't got no father (It's like)
I just want some justice, I just want some peace
Everyday niggas dying in the streets
Everyday niggas dying industry
All this fucking beef and I don't even eat (It's like)
Wrong colors and we sworn enemies
I just wanna come together take the streets
Overdosing while my niggas die, shots fired why he gotta die? (It's like)
Sometimes it's hard but nigga you alive
Sometimes it's hard to see the truth inside
Life inside a box, throw away the key
Who are you to judge her, who could make her free? (It's like)
Tired of nigga beating up women, tired of women hating on men
Baby momma trying to control shit, play the victim seen the roles switch (It's like)
Remember how to love your own shit
Remember how to love your homies
Remember people out here homeless
This is living at your own risk (It's like)
'cause ain't nobody walkin' perfect
All this money, was it worth it?
All this ice am I the coldest?
Sacrifice am I the chosen (It's like)
Am I living for the moment
The past hurts but it's golden
The future bright all this moonlight
Call it suicide when you too righteous

It's like they (It's like they)
Won't get you 'til you're gone
Just hope when I'm dead
I live on through these songs (these songs)
It's okay (it's okay)
You've got the right to move on (to move on)
Just don't forget (it's okay)
What it's like when I was (when I was still here with you)

This is bigger than some music
And all my niggas going through it
Life ain't supposed to be this way
Desensitized from real decay (It's like)
Weighing on my inner conscience
Especially when out of context
Text me for a little convo
Fallen soldiers, come home (It's like)
I just rally for the cause (aye aye)
Then I round up all my dawgs (aye aye)
Get the fuck up out of dodge (aye aye)
Life ain't posed to be this hard (aye aye) (It's like)
I don't wanna cry no more (aye aye)
rehab ain't about a choice (aye aye)
Wishing that we'd find a cure (aye aye)

This the pain we can't ignore (It's like)

First off I wanna say, RIP to Mac Miller
We gon' smoke these flowers in your honor
Drowning, riding around through the city
(It's like)

World's supposed to be mine but these bitches like gimme gimme gimme
But before I let it burn though, these are my confessions
(It's like)

Love hard like my mother, too much pride like my father
Don't think I'm strong enough to be a brother
Way too fucked up to be a lover (It's like)
Damaged goods, couldn't make it through the rubble
Under my hood is a sick mind, with some deep thoughts
I'm in trouble, problems piling up, emotions bottled up
I'm volatile (It's like),

Promise you wish I was drama-proof

But why waste wishes on something so comical, unbalanced chemical

More money more problems, commas and decimals (damn)

I guess that's just what the dollars do (It's like)

Shall I fly without losing my flock

Will I die before making my mark

Heaven knows that I gave y'all my heart

Man I gave you my all, zero day from the start (It's like)

Life's a challenge, it'll break you to parts

You are not gone, you entered the void

No energy's lost, immortality you get through these songs

Since they ripped me from umbilical cord (It's like),

Can't figure what leads to these cynical thoughts

Extending my arm like the man on the cross

You gave me a hug, stabbed through my back and punctured my heart

It's like they (It's like they)

Won't get you 'til you're gone

Just hope when I'm dead I live on through these songs (these songs)

It's okay (it's okay)

You've got the right to move on (to move on)

Just don't forget (it's okay)

What it's like when I was (when I was still here with you)

Still here with you

Still here with you

I wish I was still here with you

I am still here with you
