

# Chloroform

Flickerstick

And if I couldn't attain  
All I need to explain  
Would she even look me in the eye again  
She sits back and ignores  
My need to adore  
Intimidations got me down again  
She's only eighteen  
But such a beautiful dream  
All she needs is some chloroform and she'll be mine

Chloroform the one  
The one that you love  
And take her back

Every once in a while  
I catch a strut and a smile  
Maybe rejection  
Is the high that keeps me coming here  
I need some compassion  
But she's laughing at the nervousness I feel whenever she is around  
And I can't see  
Just how real is the charm  
No I don't mean her no harm  
Despite my heart  
And the challenge while she's lying here

Chloroform the one  
The one that you love  
And take her back

So just walk on by I can see today is like any other day  
But it seems brighter than it was before  
I just can't believe that it's  
Not the same  
No it's not the same  
It will never be the same for me again

Chloroform the one  
The one that you love  
And take her back
