Full Speed Ahead

Full speed ahead, that's what I said He didn't think about tomorrow Full speed ahead, that's all he wanted Another line or two would do him fine He had his brains all out of time He kinda liked it that way Kinda relieved it every day He went full speed ahead Full speed ahead, that's what I said Things became rather repetitious He didn't know how to handle it, he dis it He couldn't figure out what it was about He didn't stop in time or shout Whenever there was too much inside He just felt everything and died He didn't know what else to do He went full speed ahead He didn't know everybody he knew And his body said full speed ahead Gotta get out that vacuum cleaner Full speed ahead, that's what it said Full speed ahead, that's what it said That's all he wanted, that's all he knew And then he crashed for a million years
