

Medicine Woman

Floater

Hey, hey, medicine woman
Do your dance
Take the pain

Slay the lamb
Slay the minister
Make me whole again

Did you feel that?
Did you like it?
Straight to heaven, no need to pray

Don't make it all so complicated
Watch the background fade away

Hey, hey, let our legions swallow you

And we're only
Half a mile from home
We're so lonely
One more night alone...

Don't leave me alone with him
(And the feelings closing in...)
Don't leave me alone with him
(And the minister starts to grin...)
Yeah

Hey, hey, astro-traveler
Has your family gone away?
Do they lambs obey the minister?
For your wretched soul they pray

Did you see that?
Did you like it?
The way the sheep all flock that way?
Don't make it all so complicated
Watch the background fade away

Hey, hey, let our legions swallow you

And we're only
Half a mile from home
We're so lonely
One more night alone...

Don't leave me alone with him
(And the feeling is closing in...)
Don't leave me alone with him
(And the minister starts to grin...)
