

# Revolution

Flogging Molly

I spent 27 years in this factory  
And the bossman says you're not what we need  
The penguins in the suits they know nothing but greed  
It's a solitary life when you have mouths to feed  
But who cares about us

Now I'm back on the streets with my hands held shut  
I'm a working man without any work  
Well is this the way it's meant to be  
Because I signed off of the American Dream  
Now, I write my name to the welfare sheet  
The money in the bank - well that's history

So take me down to where the worlds collide  
Need to be here 'till I'm satisfied  
So let the revolution begin

Now I drag these bones cross the barren land  
Where once a city now an outstretched end  
We can't lose our sense of dignity  
While the fat race cats they fuck the creed  
Another disappearing act calls up the sleep  
While the church is on our back see the refugee

So take me down to where the worlds collide  
I need to be here 'till I'm satisfied  
There'll come a day when all of us will show  
We all feel free!  
Although we crash it we will burn  
Let the revolution  
The revolution begin

I spent 27 years in this factory  
Now the bossman says you're not what we need  
The penguins in the suits they know nothing but greed  
It's a solitary life when you have mouths to feed

So take me down to where the worlds collide  
Need to be here when I'm satisfied

So take me down to where the worlds divide  
And you'll be here  
I won't compromise

There'll come a day when all of us will show  
We'll all feel free  
'cause from the ashes we will grow!  
So let  
The Revolution  
The Revolution  
The Revolution  
Begin!  
Begin!  
Begin!  
Begin!
