

Survive

Flotsam and Jetsam

I can tell you all just what I think
I'm the media, I make the truth become
Mass hysteria is how I know I'm good
See the world from my own point of view

Defenseless little lives
Becoming raped and scarred
The button pushed as number three is in the cards
The weather coming down and wiping out another town
The plague that takes us over will survive another day

Can we survive another this
The terror and the pain
The tragic loss, again
Can we survive another this
As history repeats itself again

You believe in everything I tell you
You react to everything I say
There's a time you think things for yourself
Let it go for one more funkin' day

Defenseless little lives
Becoming raped and scarred
The button pushed as number three is in the cards
The weather coming down and wiping out another town
The plague that takes us over will survive another day

Can we survive another this
The terror and the pain
The tragic loss, again
Can we survive another this
As history repeats itself again

Plan your lives on stories that I tell you
'Show no fear', I tell you with a smile

Defenseless little lives battling so hard
Pushing buttons to bring war into your yard
The weather coming down
and tearing through another town
The famine takes us over
won't survive another day

Can we survive another this
The terror and the pain
The tragic loss, again
Can we survive another this
As history repeats itself again
