(Verse)

I still wanna be a space man
Explore a distant land
As we contemplate the credible
Unfold the master plan
And we said jump and they said how high?
I wanna soar across the sky
And revolution is a resource
And we got enough, startin up
Count down to the scientist

Count down to the scientist

(Verse)

I still wanna be a space man
Show the people that we can
Make our magic inescapable
Rewrite the master plan
When I say jump I don't think how high
I got the starlight in my eyes
It's where the notion is a resource
And we got enough starting up
Count down to the scientist

Count down to the scientist

(Verse)

I still wanna be a space man
Explore a distant land
As we contemplate the credible
Unfold the master plan
And we said jump and they said how high?
I wanna soar across the sky
And revolution is a resource
And we got enough, startin up
Count down to the scientist

Count down to the scientist Count down to the scientist
