## **Survival Car**

## **Fountains of Wayne**

Don't you wanna ride in my Survival car We can take the long way home Through Central Park

Funny how the ground can find my wheels I'm going where the road ain't there And only riding on the path we made To Union Square

Doing like the young folks do In west coast towns Plowing like a banshee through The overground

Funny how the ground can find my wheels I'm going where the road won't dare And only riding on the path we made To Union Square

Everybody hit the ground
I think I might have missed my calling
Everybody turn around

The light's about to change You better stand aside Why you wanna walk Don't you want to ride ride ride

Don't you wanna ride in my Survival car We can take the long way home

Funny how the ground can find my wheels I'm going where the road won't there And only riding on the path we made To Union Square
And only riding on the path we made Riding on the path we made Riding on the path we made To Union Square

Don't you wanna ride in my Survival car We can take the long way home
