

Love Somebody

Francesca Battistelli

Life's been unkind to her
She feels alone
Her world keeps turning
But nobody knows
One conversation
One how are you
One simple moment
Could carry her through

A little bit of kindness goes a long way
It can chase the hurt away

That's what happens when you love somebody
When you put whole heart in it
Pouring out what you've been given
It can change everything, everything
Everything, everything
When you love somebody
And you give it no conditions
When you really show them Jesus
It can change everything, everything
Everything, everything
When you love somebody
Love somebody

Dead hearts start beating
Old walls fall down
Deep wounds start healing
When love reaches out
Blind eyes come open
New life can grow
Chains start breaking
Guilt and shame get
Drowned by hope

That's what happens when you love somebody
When you put whole heart in it
Pouring out what you've been given
It can change everything, everything
Everything, everything
When you love somebody
And you give it no conditions
When you really show them Jesus
It can change everything, everything
Everything, everything
When you love somebody
Love somebody

He saw my sin took it upon Him
Laid down his life and set me free

That's what happens when you love somebody
(A little bit of kindness goes a long way)
(A little bit of kindness goes a long way)

That's what happens when you love somebody
When you put whole heart in it

Pouring out what you've been given
It can change everything, everything
Everything, everything
When you love somebody
And you give it no conditions
When you really show them Jesus
It can change everything, everything
Everything, everything
When you love somebody
Love somebody

When you love somebody
Love somebody
(A little bit of kindness goes a long way)
Love somebody
(A little bit of kindness goes a long way)
Love somebody
