The Very Best

Francesca Battistelli

The very best The very best

We are the start of a movement We do the things worth doing We know this is our moment So we own it

We are the next generation We got the words worth saying We have the spark to inspire To start a fire

We are worth Nothing less, nothing less Than the best We are worth Nothing less, nothing less Than the best We are the light in the darkness Come on and help get it started We are worth Nothing less, nothing less Than the very best

We are worth the very best We are worth the very best

We're standing tall like giants We're shining bright like diamonds We know the power inside us So we triumph

We're gonna shake the nations Breaking all expectations History in the making Let me hear you say it

We are worth Nothing less, nothing less Than the best We are worth Nothing less, nothing less Than the best We are the light in the darkness Come on and help get it started We are worth Nothing less, nothing less Than the very best

We are worth the very best We are worth the very best

Confident, champions We know who we are We were meant to change the world This is where it starts Confident, champions We know who we are We were meant to change the world This is where it starts

We are worth Nothing less, nothing less Than the best We are worth Nothing less, nothing less Than the best We are the light in the darkness Come on and help get it started We are worth Nothing less, nothing less Than the very best

We are worth the very best We are worth the very best
