

Oddball

Frank Black

In between the matter I would fall
Like the notes between the chords of this song
Impossibilities would be great
I could attend, I would not be late
For the gathering of the society of the

Oddballs
Though every ball is different
Oddball
I might as well be all alone if I'm not
Oddball
'Cause time between the oddballs is so very long

OK, now I'd like to talk to all of you about math

Mathematics moves at such a crawl
And gravity is a-mighty strong
So strong, every place an orb
So many places to count, I cannot absorb
Yeah, but every now and then there's an

Oddball
Though every ball is different
Oddball
I might as well be all alone if I'm not
Oddball
'Cause space between the oddballs is so very long
