

Why don't we look around
Take some time and settle down?
Just hold my hand and dip your head
Lean in closer to my chest
And listen to my heart beating
Let it show you love
I'll take you to the places
We're both dreaming of

I'll do it all, all again
Right to the very night
Where we first met
I'll do it all, all again
I'll take you back right to
Where we begin
Do it all, all again

I can't wait for your love
Want it now, don't give up
Just take a chance and let me in
Make me come back again
I'm standing right in front of you
Waiting on your words
Why you gotta fight this?
Tell me what you heard

I'll do it all, all again
Right to the very night
Where we first met
I'll do it all, all again
I'll take you back right to
Where we begin

I'll do it all, all again
Right to the very night
Where we first met
I'll do it all, all again
I'll take you back right to
Where we begin

I'll do it all, all again
Right to the very night
Where we first met
Do it all, all again
Do it all, do it all again
