

## Lexicon of Love

Frankmusik

She's a lexicon of love  
Sent from up above  
A diamond in the rough  
And I can't get enough

Teenage feelings keep me singing  
You're heaven, I'm waiting  
For you to come and rescue me  
Every day and every night  
Only you can get me right  
Keep imagining this love you conjure up

She's a lexicon of love  
Sent from up above  
A diamond in the rough  
And I can't get enough

I can't explain how the night turns to day  
Tell me how you do  
Making every sunrise feel new  
Having me think I can fly through the sky  
Catch me floating, arms wide open  
Now I'm coming for you

She's a lexicon of love  
Sent from up above  
A diamond in the rough  
And I can't get enough

Take me down to this life  
We found magic underground  
Feel the love, oh  
I couldn't give you up  
My nature will pick me up  
[?] lady love  
Got me loving it, loving it

She's a lexicon of love  
Sent from up above  
A diamond in the rough  
And I can't get enough
