

You got one name and it's Your Highness
I've seen the others and you're the finest
And I can't deny be waiting your behind us
I've been a fool while you're the wisest
You show me life is not so tragic
When I close my eyes you're there like magic
We travel seven seas so we can have it
You know where to land in town, I'm on automatic

You should know
I can't let go
Cause I need you to grow
I wish there was a million million planets that I could, I could show
You should know
I can't let go
Cause I need you to grow
I wish there was a million million planets that I could, I could show

I'll see you further, you're the motion
You're washing on me just like a potion
With unescapable fire to your devotion
You're the petrol that is workin' on up our ocean
You're the queen that I'm gonna worship
I'll do it until I don't deserve it
You speak into my heart, I think I heard it
Watch me run a billion miles cause I know you're worth it

You should know
I can't let go
Cause I need you to grow
I wish there was a million million planets that I could, I could show

Now I hear birds sing
I feel the joy it brings
And it hurts me so
Cause there's a million planets that I can never show
