

# We Collide

Frankmusik

Baby we collide  
Love will never save us from our last collision  
The rain is falling from the floor tonight  
I closed my eyes with perfect sight  
The sun and moon were face to face  
I'm walking but I won the race  
But it feels like yesterday  
Was happening again today  
I lost it all right in your arms  
It's only just begun  
When, baby we collide

Love will never save us from our last collision  
When, baby we collide  
And love is turning upside down with our decisions  
I fell and landed on the sky  
But from the ground you told me why  
I seem to wake up to a dream  
And sleep in my reality  
The book I read is reading me  
The leaves are falling on the trees  
I've got my fate and destiny  
But they're all lost on me  
When, baby we collide

Love will never save us from our last collision  
When, baby we collide  
And love is turning upside down with our decisions  
Baby we collide  
Love will never save us from our last collision  
When, baby we collide

And love is turning upside down with our decisions  
And I light my cigarette  
And I go out  
And I wonder why  
When I take my deepest breath  
It's you that shouts  
That's when you and I

Baby we collide  
Love will never save us from our last collision  
Baby we collide  
But love is turning upside down from our decisions  
Baby we collide  
Love will never save us from our last collision  
When, baby we collide  
But love is turning upside down with our decisions  
Baby we collide  
Baby we collide
