

# Heart

Freddie Hart

Heart we just got to get together  
For my own peace of mind I've got to know  
You'll be only one who really knows the answers  
You know you love her but should we keep her or let her go

Eyes are you sure you saw her cheating  
Ears love words you've heard could be a lie  
We've got everything to gain if we can keep her  
But so much too much to lose to say goodbye

Can you even imagine life without her  
At her worst she's still the best we've ever known  
Heart don't lose your head and go to pieces  
Here she comes now heart ain't it good to have her home  
Here she comes now heart ain't it good to have her home
