We Could Be Friends

Freelance Whales

I am convinced that we could be friends We have several interests in common In common

And I am convinced that we have been friends Were you a Tahitian grain of sand In a past life?

Please don't put your face into your hands, we could be friends Please don't put your face into your hands, we could be friends

I am convinced that we should be friends We compare our hearts to things that fly But cannot land

Please don't put your face into your hands, we could be friends Please don't put your face into your hands, we could be friends

Please don't put your face into your hands, we could be friends Please don't put your fret into the ways we could be friends

Please don't put your face into your hands, we could be friends I can count the ways on my two hands, we could be friends
