

Someone Like Me

From Our Hands

Dance with me it's my desire
You should respect what I want
Run for life don't run for cover
You can't succeed anymore
You can't escape it's getting strange
Come closer

Every breath you hold with every pain you feel
Another worthless piece of flesh you're captured in
I'm sick of standing all alone on empty street
Every city, every suburb has someone like me

Have you found the particular answer?
What are you looking for?
You can't succeed you'll never find an answer
To the question you don't know

Don't run for cover
You can't succeed anymore
Don't run for cover
Get yourself together
Don't leave me alone

Every breath you hold with every pain you feel
Another worthless piece of flesh you're captured in
I'm sick of standing all alone on empty street
Every city, every suburb has someone like me
