## **Until Death**

Now you have me Now I'm there Now I have you Now you care Now I got you Now you care Now you have me and Now I'm there Now we're tied - Until death us do part

Now I'm making my way inside Now I'm feeding myself with you And the more I grow, the more you decline Now we're tied until death us do part

Now it's time for you to be sure That the life we share will be long That what can't be cured has to be endured Now we're tied until death us do part
