

Down

Fuel

I gave you everything
I gave you trust and salvation
I gave you everything that I could provide
I gave you strength to stand and you shoved me
Down

I know you want me to love you
But all you ever do is bring me down
Won't you go away forever?

I've felt the world of pain
Brought me to the water and then left me dry
Took the drug from the user
Took all my strength to run the shoved me
Down

I know you want me to love you
But all you ever do is bring me down
Won't you go away forever?

It's kinda freaky just to see you crawl
And all you can do is stare
I know you're tripping
When I kick you to the curb
Like you kicked me
