

# Download The Destruction

Full Scale

I'll bless you with a smile  
Just come to understand your place here  
You're faceless

Take shelter for a while  
Underneath my wing of thorns and bile  
My child

It's all the same and you're back again  
And you're hoping  
You've been here before

You're not to blame but you're back again  
And you're coping  
Just drop to the floor

And please download my destruction

Check you're screen like a little sponge  
There's a good boy  
Thinking no more  
Run along and cry to mother

Find a way to be understood  
With a modem  
Strapped to the door  
Thinking was always underrated

And your square eyes  
Don't look so bad in this light  
The cancer only bothers you at night  
Dying slowly never looked so appealing  
Who needs scars  
When it's death you're cheating

You don't feel the time  
With curtains drawn  
You fall in love with girls  
You never saw  
Sitting in your filth don't feel so bad  
It's nothing, nothing

Now you're home with your feet up  
She's just a bore  
Better find a better boredom  
Take a shine to the little ones  
But it's money  
I need some more  
And I'd kill my neighbour  
To smell it once
