

## Engines

### Further Seems Forever

Wait for the engine to cool  
A dead team, slowing the arms at heart  
The beats I can't proceed  
To turn on waits a long expense abroad

And nothing in between  
Not a face or hand to greet  
I push this thing too hard  
I always push too hard

No one can hear me now that  
I got a cut but won't close  
The secrets are safe we both know  
A cut made in my soul  
I got a cut that won't close  
Wake up, wake up

Wait for the burn to set in  
Wait for it, wait for it  
Wait for the engine to turn  
At this stage I know what I would  
The heart it beats and won't conceive  
For what I need a long expense abroad

And nothing in between  
Not a face or hand to greet  
I push this thing too hard  
I always push too hard

I got a cut that won't close  
The secrets are safe we both know  
A cut made in my soul  
I got a cut that won't close  
I found a thing to frown  
Shake it within my grasp  
I got a cut that won't close  
I got a cut that won't close  
I got a cut that won't close never  
I got a cut that won't close never  
I got a cut that won't close never  
I got a cut that won't close never
