

Penny Black

Further Seems Forever

Penny black it's on it's over
Watch the framing falls
In the cracks where mind falls slower
When we flush for gold

Turn the screw and hand worth five points
Fingers top the sun
Taking too the every little coin
When all we earn is one

Every step moves forward
Every step moves, every step moves

Braces for cold minds
I trace my own lines
I wait in low lights
Until I find

Bits of the old place
Familiar cold ways
Distant and on the quiet hill
You know the kind

Nearly awake and pulled in pieces
Quiet doesn't good
And in sight the north increases
As you know it should

Every step moves forward
Every step moves, every step moves
Every step moves forward
Every step moves, every step moves

So precious this kill spree
Our love is divided
So marching love unseen
When it's unsighted

All cold and no distinction
Nothing on the skin
All told in all depictions
Only loved to live

The search is sanctified
We find it side by side
The search is sanctified
We find it side by side
The search is sanctified
We find it side by side
