

Stem the Loss

Further Seems Forever

Stem the loss by the grease
Turn the screw , burn the sheets
Can't find the frame looking rounds
Brand the grain ground on ground
Stem the loss by the grease

We've got no force to wild
We've better believe in something now
We've got no source to triumph
We've better believe in something now
We've got tantrum on the world
We've better believe in something now

Bend the lines raise the stones
Burn the vines set the bombs
Tape the scenes water tide
Lay the beam measure right
Start the search till they found
See to see, sound on sound
Stem the loss by the grease
Stem the loss by the grease

We've got no force to wild
We've better believe in something now
We've got no source to triumph
We've better believe in something now
We've got tantrum on the world
We've better believe in something now
We've got
We've gotta believe in something
We better believe in something now
We better believe in something now

Stem the loss by the grease
Turn the screw , burn the sheets
Stem the loss by the grease
Stem the loss by the grease
