

## World Says

### Futuristic

I'mma live how I wanna live  
I'mma be where I wanna be  
It's a cliché but this all I need  
I got my future in front of me  
See they pretending, they like the attention, they all in the m  
entions for validations  
I'm on the stand in the situation  
I get some just in a different place  
With all the ways that I'm handling life  
And it hard to be nice  
We know our wrongs from our rights  
I got some shit to live for  
I built me something and it ain't happened over night  
I've had some problems, I had to do the vision  
I cut all my losses, tell them get off me I got a new provision  
Something like this

When the world says you should become something you don't wanna  
be  
I just put my middle fingers up to the sky and wave my hands hi  
gh  
When the world says you should become something you don't wanna  
be  
I just put my middle fingers up to the sky and wave my hands hi  
gh

I been right then solo to my own drum  
Life gets right when you try to change up  
Let them do them, you gon' make your own way  
Learning, growing, from all of my mistakes  
Only thing constant is change, keeping my morals in mind  
24 hours a day, keeping the vision in line  
They tryna get me to live while they die  
Applying the pressure to live out a lie  
This ain't a lecture, a song with a message to help anybody con  
flicted inside  
I need all of that  
It feel good to be cool in my own skin  
Still authentic ever since way back  
I been all of that  
In a bag of chips, real spill I'mma keep it a buck  
When the world say "change" in a negative way  
I put both middle fingers up

When the world says you should become something you don't wanna  
be  
I just put my middle fingers up to the sky and wave my hands hi  
gh

When the world says you should become something you don't wanna  
be  
I just put my middle fingers up to the sky and wave my hands hi  
gh
