

# Forget About the World

Gabrielle

You had to take the time  
'Cause you had to make up your mind  
You really didn't want to choose  
But you had too much to lose

Time was passing by  
Didn't have it on your side  
Knew what you had to do  
To win sometimes you gotta lose

They tried to change your mind  
Told you how to live your life  
And they told stories  
Stories that shouldn't be told

It was you against the world  
But you chose to hold on to your girl  
You gotta believe that she's the one  
Worth fighting for

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

Forget about, forget about the world, yeah

Had problems in the past  
There's no use in looking back  
The future holds so much for you  
Go to the light and pass on through

You had a stronger love  
Outside forces weren't enough  
Tried their best to tear apart  
A love they hoped would never last

So they tried to change your mind  
Told you how to live your life  
And they told stories  
Stories that shouldn't be told

It was you against the world  
But you chose to hold on to your girl  
You gotta believe that she's the one  
Worth fighting for

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

You gotta hold on to what you want  
What you've been fighting for  
You gotta believe in it hold on  
Until you can fight no more

You gotta hold on and you will see  
See your destiny then you will know  
Which way to go

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you

Forget about the world  
And worry about the girl  
Not what they say  
Not what they say, your future holds for you  
...
