The Guardians of Mankind

Gamma Ray

For no one to see for no one to hear They fight for our souls without any fear When injustice done they open their gates To maintain balance between good and bad

And as the winds of freedom blow they vanish into haze The mighty shadow turns away and wisdom conquers hate

The guardians of Mankind Are losin' their faith 'Cause malice and falseness Spread over the human race If guardians of mankind Won't shelter our souls The rulers of darkness Will soon gain control

Don't try to deceive them don't try to play false 'Cause losing their favour will be the end of shelter

And as the winds of freedom blow they vanish into haze The mighty shadow turns away and wisdom conquers hate The guardians of Mankind Are losin' their faith 'Cause malice and falseness Spread over the human race If guardians of mankind Won't shelter our souls The rulers of darkness Will soon gain control
