

The Colder It Feels

Gary Barlow

Can't hold back the tears
It's taken years
To ignore the sound
Of you not around

That Winter of pain
It comes 'round again
The more light it steals
The colder it feels

Courage and patience
Need acclimation
It's too soon to know
If I'll survive this cold

Driving with no vision
Can't avoid this collision
And the more I conceal
The colder it feels

When memories bite at your heels
The colder it feels

This Christmas, this Christmas
To anyone who listens
The scared and the fearless
Share hope and forgiveness

It's all in my hands
I just need to land
But looking down on these fields
The colder it feels

This Christmas, this Christmas
To anyone who listens
The scared and the fearless
Share hope and forgiveness

I heard someone say
It's only a day
But as Winter reveals
The colder it feels
When memories bite at your heels
The colder it feels
