Please Come Home

Gary Clark Jr.

My love is with you

Even though you're far away

You make me love you

And that's where my love will stay

Those times I get lonely
You're the one who truly knows me
I can tell it in the way you talk
You show me

Why don't you please come home Come on home, girl You've been gone way too long Come on home, girl

As time goes by
My days go by slower
My nights are getting colder
And my mind has gone astray
