

Ghosts

Gary Jules

C **G**
Running along the rocks of the river
F **C**
And the water's as cold as the snow
C **G**
The man is chasing behind me
F **C**
And I can't afford to falter or slow
Dm **F**
I find solace in what we believe
C **G**
Or the hush of a cool gentle rain
C **G** **F**
But there's something we love in the mystery
Dm **G** **C**
Of a man in the midst of a change
C **G**
She laughed and said I was going nowhere
F **C**
'Cause it's nowhere that she's ever been
C **G**
When I get to that place she'll remember my face
F **C**
And say "Hey man, I knew him when he was younger"
Dm **F**
But she never loved me at all
C **G**
She laughed when I was in pain
C **G** **F**
'Cause there's something that we are all frightened of
Dm **G** **C**
In the man in the midst of a change
C **G**
Out on the roof to inquire of the sky
Dm **F**
The existence of ghosts in my life
F **C**
Who's to blame you or I?
C
No one would answer me
F **G**
They just stared with the weight of the world I pretend not to feel

The windmill is poised for the battle
But the fool understands not the game
He believes in his mission, predestined position
Amazing the grace of her name
Oh he loves her now as he loved her then
Rocinante remembers the days
When I whistled and sat waiting patiently
With the man in the midst of a change

Running along the rocks of the river
With the freedom to step where I choose
Though I can't stop to rest I like traveling best
And besides, I've got nothing to lose from it
I find solace in all the extremes

In pleasure as well as in pain
I just wish he would let me explain to you
The man in the midst of a change
