## I Am Dust

## **Gary Numan**

We we're dust in a world Of grim obsession.

We wouldn't taunt from mouth Like an isolation.

We we're pulled from our path Of least resistance.

And the songs we sang What became of us?

We're here waiting for you We're here waiting for you

We are yours We're waiting for you We are yours We're waiting for you

We all pray for the end For the god to take us.

We we're falling down One by one.

We we're weak and the fear Was all around us.

The machines screamed from Moon to sun.

We're here waiting for you We're here waiting for you

We are yours We're waiting for you We are yours We're waiting for you
