My Car Slides

Gary Numan

Now there's a girl outside my door She's raw pink shame She makes love as the machines play Sound effects of mayhem She disconnects my young heart at times The cure comes next

Here am I
Sad and lonely
Here am I
Quite by chance I slide

She has the problem of need
Not conversation
She can only whisper such things
Like 'I tear inside'
She's like a gangster in drag I knew
Skin like china

Here am I Sad and lonely Here am I
