

# Show Me the Way

Gary Valenciano

Show me the way to make you feel right  
Never hesitate to give some room for me  
Show me the way into your heart tonight  
And I'll be there for you my love... girl anytime

So many time it seems through thick and thin we've been  
Bumping around messing around almost have called it quits... (but love)  
Is always on top of it all thicker and stronger we go  
Coz we make a vow to show us how... we're made for one another  
You know how much I care for all the things you are  
I'm so devoted to you

If you just close your eyes and maybe realize  
Running around loosing around  
Leaving our cares behind (but life) full of uncertainties  
Stress in big quantities we make mistake loosing our faith  
But baby never too late...  
If we just focus to live and love we will conquer the pain  
And have everything to gain...

If you care... if you aware, I'm pulling myself alone  
If you dare... love is share, sentimental groove baby  
Deep inside my heart, it's just one name it's you  
Baby... baby... baby... baby...

Come on baby just show me the way  
You got to give me some direction once a while in the day  
I can't do this alone, so leave me here on my own  
You know it takes two together this lover thing going on  
You can trust me girl in this crazy world  
You know that no one else but me that can give love before

Yeah... oh so baby baby don't you give it a doubt cause  
All the love I feel for you just wanna make me go shout... ohh!

If we focus to live and love  
We conquer the pain and have everything to gain...
