

Sing A Song

Gary Wright

You've been feeling so down that your life is in a mess
Can't seem to do a thing right
Every time you look around there's someone in distress
The whole world is caught up in a fight

And I know just how bad you feel
'Cause life ain't meant for pain
And you've been dealt your dirty deal
And I know that you don't need pain again

But if I, sing a song and make it happen
Sing a song and change your mind
Then will ya, stay with me and we'll be happy
Share in all the love we can find

You've been running away from yourself now it seems
Lately you can't sleep at night
Everything that you do is always in extremes
I know just the thing to put you right

'Cause you know your life just ain't real
It gets worse day by day
Forgettin' just how good love feels
And I know that you can't go on this way

But if I, sing a song and make it happen
Sing a song and change your mind
Then will ya, stay with me and we'll be happy
Share in all the love we can find

Yes if I, sing a song and make you happy
Sing a song and change your mind
Then will ya, stay with me and we'll be happy
Share in all the love we can find

Sing a song and make you happy
Sing a song and change your mind
Then will ya, stay with me and we'll be happy
Share in all the love we can find

Yes if I, sing a song and make you happy
Sing a song and change your mind
Then will ya, stay with me and we'll be happy
