

# Where We Started From

## Gemini Syndrome

Paradise in a fashion  
A perception of the mind  
Like a gift from the ether  
I never thought I'd find  
(I never thought I'd find)

Here we are back where we started from  
It was always now or never  
And now everything's forever so it seems  
What's done cannot be undone  
The song is just beginning  
And the melody plays on and on and on

Paranoid as a passion  
Keeping everything at bay  
I keep thinking, maybe hoping  
Praying there's another way  
There's another way

Here we are back where we started from  
It was always now or never  
And now everything's forever so it seems  
What's done cannot be undone  
The song is just beginning  
And the melody plays on and on and on

The song is just beginning  
The melody plays on and on and on  
The song is just beginning  
The melody plays on and on and on

It's always been now or never  
Now everything is forever  
So it seems  
So it seems  
What's done cannot be undone  
The melody's just begun  
So it seems  
So it seems

Here we are back where we started from  
It was always now or never  
And now everything's forever so it seems  
What's done cannot be undone  
The song is just beginning  
And the melody plays on and on and on

The song is just beginning  
The melody plays on and on and on  
The song is just beginning  
The melody plays on and on and on
