

# Little Betty Falling Star

Gene Pitney

I put you up there  
So far above me  
An angel star  
Just meant to love me

'Till something happened to you  
You used to shine in the blue  
And the world was under your spell  
'Till down from the sky you fell  
Little Betty falling star

No star was ever so bright  
And we would meet every night  
Now my empty arms long for you  
I just can't believe we're through  
Little Betty falling star

I put you up there  
So far above me  
An angel star  
Just meant to love me

Well you made me cry  
Would you please tell me why  
I turned out to be so wrong  
Where is my star, why has it gone  
There's no quarrel we cannot patch  
So I'm waiting her to catch  
Little Betty falling star
