1,000 Dreams

Gene Simmons

```
I dream a thousand dreams
I'd wait a million lifetimes for you
If you just give me a smile
I could die and be happy too

I'd wait a thousand years
I'd walk a million miles for you
And all I need is a sweet reminder
That you want me too

And when you smile that simple smile
You change my darkness to light
I might as well stop breathing
If you don't believe it's right

I'd do it all for you
If only one of my dreams come true
Cause every night would be ecstasy
If I could be with you

Try as I might to find a way
To get you out of my mind
I just can't help myself
From crying every night

And when you smile that simple smile
You change my darkness to light
I might as well stop breathing
If you don't believe it's right

I'd do it all for you
If only one of my dreams come true
Cause every night would be exctasy
If I could be with you

Yes, every night would be exctasy
If I could be with you...
```
