

# Honey Hush

George Jones

So many things are on your mind  
You look troubled and scared to death  
And the chores you missed on your very long list  
That won't let you catch your breath.

I know we've had some hard times  
But I won't let that get in your way  
Before you cry tonight and get up tight  
There's one thing that I'd like to say.

Honey hush, turn the lights down low  
Don't push so hard  
Leave our cares and woes  
And won't you please  
Let me lead you across the floor.

Honey hush, it'll be alright  
Don't you think we should discuss  
Oh, but not tonight  
We can worry in the mornin'  
But right now, Honey hush.

(Instrumental)

Things don't change very easy  
It's like our whole world is falling apart  
But this love we share shows how much we care  
We're forever joined at the heart.

I believe that we will get through this  
Though we don't rightly know what to do  
If there's a will there's a way with these bills to pay  
As long as I know I've got you.

Honey hush, turn the lights down low  
Don't push to hard  
Leave your cares and woe  
And dance with me  
Let me lead you across the floor.

Honey hush, It'll be alright  
Don't you think we  
Oh, but not tonight  
We can worry in the mornin'  
But right now, Honey hush.

We can worry in the mornin'  
But right now, Honey hush.

Honey hush...
