

Dark Days

Gerry Cinnamon

The weather wisny great
I was a black cloud floating
You were a moon beam in the sky

Longing for the day
I threw myself into your light
Unthreatened by the night

Nothing stays the same
But still the world is turning
At least there's some things never change

If life is just a game
And luck is for losers
Then I'm winning again

Dark days, these are dark days
But I heard that there's an easier way
These are the best days that you're ever gonna have

Dark days, but I got sun rays
'Cause I know that there's an easier way to love
These are the best days that you're ever gonna have

Dark days, these are dark days
But I heard that there's an easier way
These are the best days that you're ever gonna have

Dark days, but I got sun rays
'Cause I know that there's an easier way to love
These are the best days that you're ever gonna have
The best days that you're ever gonna have
The best days, the best days
