My Town

Golden Earring

My town, is sittin' on the ocean My town, paradise livin' My town, my town is alright I've got fine friends, livin' 'round the corner Crazy friends, party every night My friend, my friend, is alright

I'll give you some time to make up your mind Give you some time to pack a samsonite Gotta start lookin' for the signs The signs leadin' to my town

We've got big girls sittin' in the red light Pretty girls bakin' in the sunlight Our girls, our girls are alright I got no fear for the cops and the robber I drink beer with the drunks and the dealer Our town, my town is alright

Give me some time to make up your mind Give me some time to pack a samsonite We're all gonna set this city on fire Come alive, down in my town How about your town, baby How about your town, baby How about, how about..... My town, is floatin' down the river My town, lies dreamin' in the valley My town, my town is alright We've got nightclubs, discotheques, theatres Shoeshine and cheap parking meters We've got hotels, motels, a line

Give you some time to make up your mind Give you some time with a samsonite We're gonna set this city on fire We're on fire, down in my town Get down to my town
